Elon Musk's Hair Transplant

Elon Musk has experienced hair thinning and a receding hairline, but he's not completely bald. He's undergone successful hair transplant procedures to restore his hairline and hair density. Photos from the early 2000s show that Musk began balding in his 20s. However, he's been seen with thicker hair in the 2010s. Musk has never

AI Overview

+5

Elon Musk experienced significant male pattern baldness (around Norwood stage 3-4) in his late 20s and early 30s, particularly visible during the PayPal era. He is widely believed to have undergone multiple high-quality hair transplants, likely Follicular Unit Transplantation (FUT), to restore his hairline. YouTube +4
